INFORMED CONSENT

***To the patient:** Please read this entire document prior to signing it. It is very important that you understand the information contained in this document. If anything is unclear, please ask questions before you sign.

The nature of the chiropractic adjustment
The primary treatment used at Crabtree Chiropractic Center is spinal manipulative therapy. We will use that procedure to treat you. We may use hands or a mechanical instrument upon your body in such a way as to move your joints. That may cause an audible "pop" or "click," much as you have experienced when you "crack" your knuckles. You may feel a sense of movement.

Analysis / Examination / Treatment
As a part of the analysis, examination and treatment, you are consenting to the following core procedures: Spinal manipulative therapy, exercises, vital signs, range of motion testing, orthopedic testing, basic neurological testing, muscle strength testing, postural analysis testing, home instructions, hot/cold therapy, electrical stimulation, radiographic studies, mechanical traction, do's and don'ts for proper spinal hygiene and attendance at spinal care class.

The material risks inherent in chiropractic adjustment
As with any healthcare procedure, there are certain complications which may arise during treatment. These complications include but are not limited to: fractures, disc injuries, dislocations, stroke, muscle strain, cervical myelopathy, costovertebral strains and separations and burns. Some patients will feel some stiffness and soreness following the first few days of treatment. I will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to my attention, it is your responsibility to inform us before treatment begins.

The probability of those risks occurring
Any complications associated with chiropractic treatment are generally described as rare. Fractures are rare occurrences and generally result from some underlying weakness of the bone which we check for during the taking of your history and during examination and X-ray. The incidence of stroke is exceedingly rare and is estimated to occur between one in one million and one in five million cervical adjustments.

The availability and nature of other treatment option
Other treatment options for your condition may include:

> Self – administered, over-the-counter analgesics and rest, massage, acupuncture, medical and prescription drugs such as anti-inflammatory, muscle relaxants and pain killers, hospitalization and/or surgery.
> If you chose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physician.

The risks and dangers attendant to remaining untreated
Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

DO NOT SIGN UNTIL YOU READ AND UNDERSTAND THE ABOVE.

***PLEASE CHECK THE APPROPRIATE OPTION BELOW*; then PRINT Name, SIGN & DATE.**

( ) I have read or… **( ) Someone has read to me**… the above explanation of the chiropractic adjustment and any related treatment. I understand that any health concerns or questions will be discussed with the staff of Crabtree Chiropractic Center before treatment. By signing below I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
